PROJECTS

Cloud Video Storage System (S3-like)

Aug 2026 – Present

Node.js, Express.js, MongoDB, Redis, Apache Kafka, Docker, AWS EC2, Nginx, HLS

- Developed a cloud video storage platform to handle large media uploads, metadata management, and secure video streaming in one system.
- Implemented secure authentication, multipart uploads, presigned URL access, metadata workflows, and adaptive HLS streaming for large video files.
- Architected an asynchronous processing system using Apache Kafka and Redis to decouple upload, processing, and delivery workflows, with Docker deployment on AWS EC2 behind Nginx.

Quick Commerce Platform (Blinkit-style + AI)

Aug 2026 – Present

React.js, TypeScript, Node.js, Express.js, MongoDB, Redis, Apache Kafka, WebSockets, Elasticsearch, Vector Embeddings

- Engineered a quick-commerce platform to handle product discovery, inventory, carts, orders, payments, and real-time delivery tracking.
- Designed robust features for authentication, product cataloging, inventory management, cart workflows, order lifecycles, and role-based administration.
- Orchestrated event-driven workflows using Apache Kafka, Redis, WebSockets, Elasticsearch, and vector embeddings for real-time updates, search, and recommendations.

HackCrux – Real-Time Disaster Information Aggregator

[GitHub](#)

Python, BERT, REST APIs, Pandas

- Spearheaded a disaster information aggregator to solve delayed and fragmented access to reliable disaster updates from public sources.
- Automated API data collection, NLP preprocessing, BERT-based classification, duplicate removal, and trust-based filtering for disaster reports.
- Processed public REST API data using Python, Pandas, and NLP models to generate actionable emergency insights and visualizations.

TECHNICAL SKILLS

Languages: C++, JavaScript, TypeScript, Python

Backend: Node.js, Express.js, REST APIs, JWT, WebSockets

Frontend: React.js, Tailwind CSS, Redux Toolkit

Databases: MongoDB, PostgreSQL, Redis, Elasticsearch

Distributed Systems: Apache Kafka, Event-Driven Architecture, Caching, HLS Streaming

Cloud & DevOps: Docker, AWS EC2, Nginx, Linux, Git, GitHub

AI: Gemini API, OpenRouter, Vector Embeddings, AI Agents

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

PROBLEM SOLVING & ACHIEVEMENTS

Competitive Programming

- Solved 1750+ algorithmic problems across LeetCode, Codeforces, CodeChef, GeeksforGeeks, and other platforms.
- **LeetCode:** Max Rating 1714 with consistent participation in Weekly and Biweekly contests.
- **Codeforces:** Max Rating 1225 (Pupil).
- **CodeChef:** Max Rating 1586 with a global rank of 398 in Starters 222.
- Maintained 550+ active coding days and participated in 130+ competitive programming contests.

Winner – HackCrux 2025, LNMIIT Jaipur

[Certificate](#)

- Led a 4-member team to secure 1st Place among 90+ teams.

EDUCATION

Jabalpur Engineering College

B.Tech in Computer Science & Engineering

Jabalpur, Madhya Pradesh

2024 – 2028
